

We are a busy and well-established construction company looking for a dependable **Diesel Mechanic with fabrication skills** to maintain and repair our fleet of heavy equipment. If you have hands-on experience with construction machinery and can fabricate parts and components as needed, this is an excellent opportunity to join a solid team with year-round work.

Key Responsibilities:

- Diagnose and repair diesel engines, transmissions, hydraulics, and electrical systems on construction equipment such as excavators, dozers, loaders, and skid steers.
- Perform regular preventative maintenance and inspections.
- Fabricate, weld, and modify parts, attachments, and structural components.
- Troubleshoot field issues and perform mobile repairs when necessary.
- Maintain accurate records of work performed and parts used.
- Ensure all work meets safety standards and company guidelines.

Qualifications:

- 3+ years of experience as a diesel mechanic, preferably with heavy construction equipment.
- Skilled in MIG, TIG, and Stick welding.
- Strong fabrication ability—capable of building and modifying metal components from blueprints or on-the-fly solutions.
- Solid understanding of hydraulic and electrical systems.
- Ability to work independently in the shop and in the field.
- Valid driver's license required (CDL a plus).

Preferred Experience:

- Field service truck operation and job site repairs.
- Familiarity with DOT and OSHA safety regulations.

Position Type and Hours:

- Full-time position, Monday to Friday during normal business hours.

Why Join Us?

- Competitive salary and benefits package.
- Collaborative and supportive team environment.
- Opportunities for career growth and development.
