Advanced Rehabilitation Technology is your single source of expertise for underground infrastructure repair.

CCTV Inspection · Preventative Maintenance · Manhole Inspection
Potable Water · NSF/ANSI 61 Approved

Liner Systems

- Prevents leaks, corrosion and decay in new and existing systems, including from hydrogen sulfide
- Provides an impervious barrier to water penetration
- Fast application that cures in place
- 100-year design life with a 10-year warranty
- Reinforces structural strength
- Excellent mechanical properties
- Environmentally-friendly VOC compliant

Culvert Lining

- Can be applied to any shape or configuration
- Abrasion resistant
- Minimal downtime - immediate return to service after application
- Highly flexible, yet tough
- Excellent mechanical properties
- Environmentally-friendly VOC compliant

Tank Lining

- Chemical resistant
- High-build and seamless
- Thermally stable
- Moisture tolerant
- Excellent mechanical properties
- Environmentally-friendly VOC compliant

Hydro Blasting

- Removal of loose debris from 10,000 to 40,000 PSI
- Surface cleaning, preparation and profiling for coating system
